

abberior STED ROADSHOW

Switzerland

2015

Basel	May 4-6	University of Basel
Zurich	May 7	ETH Zurich
Zurich	May 8	University of Zurich
Fribourg	May 11-12	University of Fribourg
Lausanne	May 13+15	EPFL - Swiss Institute of Technology

Bring your own samples!

Come and use the brandnew **Abberior Instruments multicolor easy3D STED microscope** with a pulsed 595 STED laser and a pulsed 775 STED laser on YOUR campus in our mobile laboratory!

Resolution down to 25x25nm (2D)
or 70x70x80nm (3D)

Abberior provides free STAR conjugates (e.g. STAR 600 and STAR 635P) optimized for the Abberior Instruments STED system. We can prepare samples together with you on workbenches installed in our mobile lab.

FEEDBACK FROM OUR ROADSHOW 2014

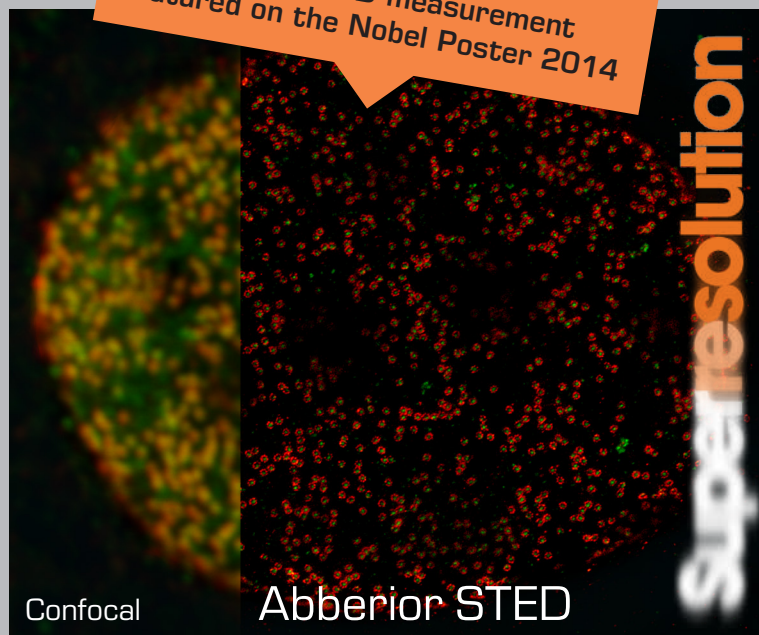

"It is amazing that your STED microscope works perfectly in a van"

"I cannot believe the stability of the system"

"To see a resolution below 30 nm in a car is amazing"

Abberior STED measurement featured on the Nobel Poster 2014
